

Amendment to the Claims

Claims:

1. (Currently Amended) A housing for a syringe driver assembly comprising a main body part (4) for supporting a syringe and at least two interchangeable covers (6a, 6b) for attachment to the main body part, ~~characterised in that~~, the main body part (4) is being sized to receive a syringe of a relatively small length, ~~and~~ a first interchangeable cover (6a) is of a similar length to the main body part for extending over the syringe to provide a closed housing; ~~and~~ wherein a second cover (6b) provides an extension (202) to the body part, the second cover having a longitudinal cross-section in the general form of a hook ~~comprising~~ having a long arm (200) and a tail (202); the long arm forming the cover for laying over the syringe and the tail forming the extension for mating with the main body part.
2. (Original) A housing as claimed in claim 1 wherein the long arm comprises two sides connected by a roof section.
3. (Currently Amended) A housing as claimed in claim 2 wherein both sides of the long arm (200) extend around to form the hook thereby forming an internal cavity or recess for receiving the end of the syringe.
4. (Currently Amended) A housing as claimed in ~~any one of the preceding claims~~ claim 3 wherein each cover (6) is hingedly mountable to the main body part.
5. (Currently Amended) A housing as claimed in ~~any one of the preceding claims~~ claim 4 wherein the main body part and covers are formed as moulded components.

6. (Currently Amended) A kit of parts for providing a housing for a syringe driver assembly comprising:

- a) a main body part ~~(4)~~ for supporting a syringe; ~~and~~
- b) at least two interchangeable covers ~~(6a, 6b)~~ for attachment to the body part;
- c) ~~characterised in that~~ a first cover is being of a ~~similar~~ length similar to the main body part for extending over the syringe to provide a closed housing; and
- d) a second cover ~~provides~~ providing an extension to the body part, ~~the second cover and~~ having a longitudinal cross-section in the general form of a hook ~~comprising~~ including a long arm ~~(200)~~ and a tail ~~(202)~~, with the long arm forming a cover for laying over the syringe and the tail forming the extension for mating with the main body part.

7. (New) A housing as claimed in claim 1 wherein each cover is hingedly mountable to the main body part.

8. (New) A housing as claimed in claim 2 wherein each cover is hingedly mountable to the main body part.

9. (New) A housing as claimed in claim 1 wherein the main body part and covers are formed as moulded components.

10. (New) A housing as claimed in claim 2 wherein the main body part and covers are formed as moulded components.

11. (New) A housing as claimed in claim 3 wherein the main body part and covers are formed as moulded components.
